Breath testing – Breathtaking

made in Germany - designed in Sweden

IRIS™ Dynamic base

^{13}C breath test analyser

kibion

World-leading supplier of breath tests to diagnose the stomach ulcer bacterium *H. pylori*

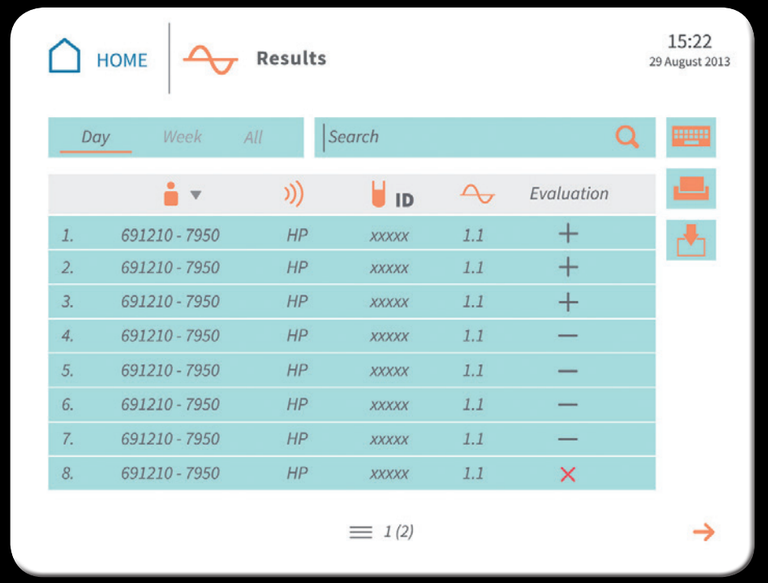
Breath testing – Breathtaking

Breathtaking technology

The latest development from the pioneers of this breath testing technology

- Large, comfortable touchscreen for all input and test options
- Built-in, fully-fledged computer (no lap- or desktop required)
- LIS can be integrated
- A new generation: faster tests, reduced sample volumes
- Developed and made in Germany

Breath testing – Breathtaking



Breathtaking functionality

Numerous ^{13}C breath tests compact in a single device.

Helicobacter pylori, gastric emptying (firm and liquid), pancreatic function, liver function

Fully flexible through its compatibility with:

- sample containers: test tubes and/or sample bags
- barcode scanning: all common standards supported
- documentation: database integrated with patient management records, graphical display of results

Breath testing – Breathtaking

Breathtaking usability

Large ergonomic touchscreen with intuitive menu navigation

- Laboratory-developed with users; based on their needs
- Setup assistance using dialog boxes for key data input and activation
- Smooth operation supported through input and validity checks

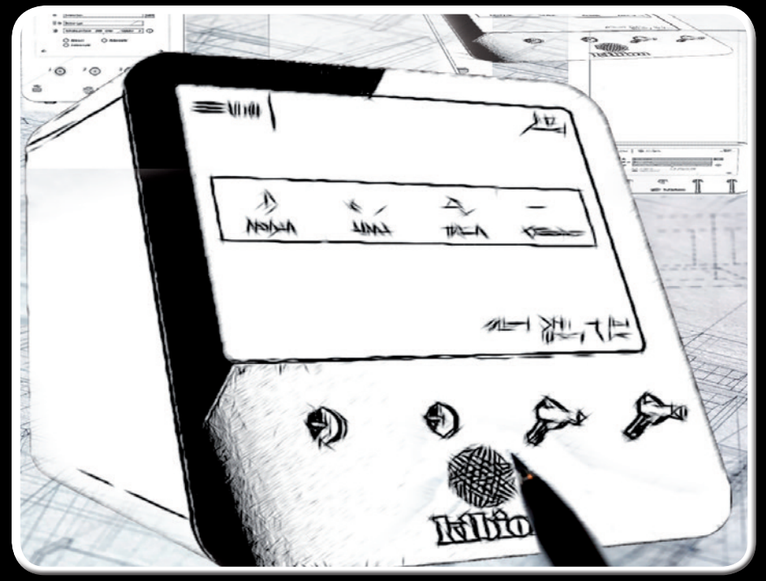
Breath testing – Breathtaking

Breathtaking flexibility

IRIS™ Dynamic base provides a stand-alone solution offering access to the whole range of functions

- The IRIS™ Dynamics concept can be fully customised to the user's needs
- Increased capacity and ability to adjust test focus made possible through the IRIS™ Dynamic pro and and IRIS™ Dynamic performance components (offering 12 or 120 additional sample slots respectively)
- Devices such as keyboard, mouse, scanner or printer can be connected into the workflow without difficulty by using USB and LAN

Breath testing – Breathtaking



Breathtaking design

Swedish design: fusion of functionality and aesthetics

- IRIS™ Dynamic base was developed by the multiple reddot award-winning design team Myra, Sweden
- Doctors and lab experts convincingly turned the brief into this excellent design concept

Breath testing – Breathtaking
